Extraction from The Universal Gravity Nature's Universal Law of Construction

The Universal Law of Nature's Structure can be found by analysis mathematically of the Solar System.

For this purpose the planetary series of distances from the Sun, as done by Titius in 1776, is suitable for the mathematical model thereof.

The following resolvment is primarily made up of the combination of "The Morad Principle" ["Duality", (mirror effect)] and the Fibonacci Series where the two previous numericals equal the next number.

This shows that The Morad Principal is an actuality in nature and that the Fibonacci Series applies not just to the living but to all of that created in nature.

The following is a system of Reciprocal Mathematics, as a reversal of Pascal's formula of "Natural Progression of Nature", forming the Principle of Morad and the Fibonacci Series. This then is Nature's Principle of its structure of the whole of the Universe, from the micro to the macro.

Nature's Law of Construction, inclusive of the micro to the macro, is a bonded unity of "The Morad Principle" and the "Fibonacci Series".

The unity, Fibonacci Series, and The Principle of Morad (Duality), are all a major factor in this resolvment. The following diagram assists those researching.

Gravity Binder of the Planets

$$3282 \times 2 = 6564 \div 1092 = 6.010989$$

$$\text{Duality} = 6564$$

$$\times 2$$

$$1092$$

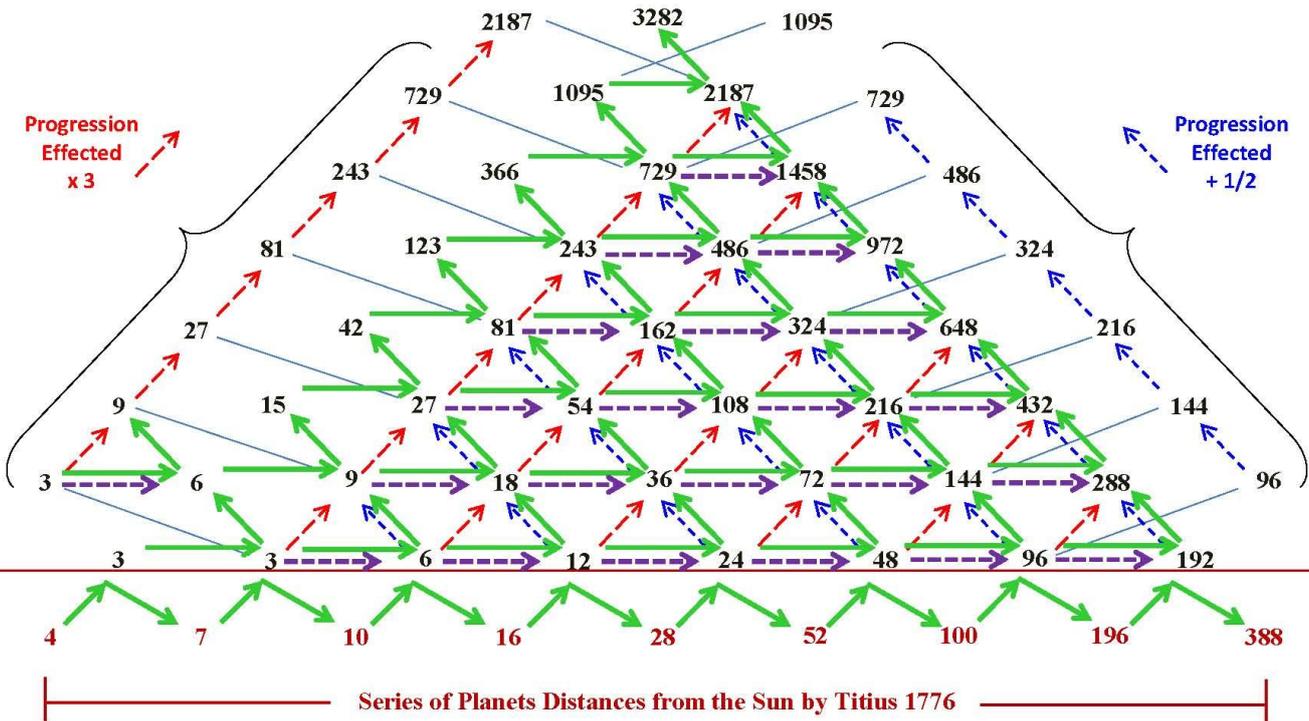

LEGEND

Progression Effected x 3 -->

Progression Effected + 1/2 -->

"Fibonacci Series" -> ->

A Morad Principle (Duality) -->

The afore emerges by application of reciprocal mathematics and a reversal of Pascal's "The Natural Progression of Nature"

The Code of the Binder of the micro atomic particles/energy is shown to be 10989, herewith.

The Combined Fibonacci Series together with a Morad Principle is:-
"Nature's Law of Universal Construction".
